Yell at people in offices

Idk yet

Talk to clinics in my area

Engaging with my community and being directly involved in or creating initiatives to address needs

I am going to have more conversations and be a part of bringing people together in a forum to discuss and advocate.

Keep writing to my representatives.

Educating myself, educating others, writing my elected officials, and potentially attending protest on the issues of maternity rights.

I will work on helping children who are directly affected by DV and help them find a safe place to live

The presenters were engaging, gave practical examples, and delivered the material clearly.
