6.2 Engage with systems utilizing evidence-based practice strategies:

I had two children today who required medication management and therapy in order to achieve the behavioral and emotive effects that parents felt were absent in their children. This process involved my initial assessment, a pre-triage with our "point" therapist, a triage with the nurse practitioner on call, and then therapy resources given to patient's mother to review. Additionally, I faxed over a Facesheet, my consult notes, **insurance** information, and a cover sheet to a local children's medical center that specializes in medication management for children. Following the fax, I confirmed over the phone that the fax was received and being processed by their office. Patients should receive a phone call within a week to schedule an appointment. 🗓️

9.2 Evaluate the efficiency and effectiveness of practice outcomes:
