

## Hospice Social Work Toolkit Survey

1. How often do you use the resource binder?

- Frequently
- Moderately
- Rarely
- Never

2. Do you find that the resource binder has enhanced your clinical practice with patients and families?

- Greatly Enhanced
- Moderately Enhanced
- Rarely Enhanced
- Never Enhanced

3. Do you feel that having copies of applications for assistance programs and community resources on hand has increased efficiency of services?

- Greatly Increased
- Moderately Increased
- Rarely Increased
- Never Increased

4. Do you feel that having the binder has increased your confidence in providing clinical support to families and patients?

- Greatly Increased
- Moderately Increased
- Rarely Increased
- Never Increased

5. What have you found to be most beneficial about having the binder?

It is helpful for me to have something in my car that I can keep with me when I am doing visits as I am the road A LOT. I like that the binder covers both the clinical aspects of our job as well as the necessary community resources. It was catered towards our specific role on the hospice team. I also like having several therapeutic modalities at my finger tips that I can pull best practices from.

6. Do you have any suggestions for how the binder could be improved for the future?

The only suggestion I would have is to have made a few more copies of the exercises and referrals for the binder. Since I am using the binder, I have already gone few a few things in it and I plan to make more copies next week. Overall, I think the binder was VERY well done and it is going to be something I am confident the social workers in our company can use for years to come. Thank you for the hard work you put into designing it for us!
